

PRESS RELEASE

For Immediate Release

Apollo Enterprise Solutions Named a Top Technology Company by Collection Advisor Magazine for Second Consecutive Year

Intelligent Debt Solutions™ System One of the Top 100 Collection Technology Products for 2006

Irvine, CA November 29, 2006 – Apollo Enterprise Solutions LLC, the leading provider of web-based payment and collection technology, announced today that the company's Intelligent Debt Solutions™ system has been selected for the second consecutive year as one of the Top 100 Collection Technology Products for 2006 by *Collection Advisor* magazine.

“At the heart of Apollo's web-based payments and collections system is Decisioning Intelligence™, a revolutionary data-driven decisioning process that delivers more debt payments by creating individual, real-time customized proposals that reflect a debtor's most realistic ability to pay,” said Apollo President Christopher Imrey.

Imrey went on to note that Apollo's advanced technology solutions come with the highest level of security and compliance available in the industry today and are designed for use in multiple industries with credit, receivables management and debt collection needs. “Now debtors can make payments, self-cure delinquent accounts or self-settle charged-off accounts 24 hours a day, seven days a week, by utilizing Apollo's web-hosted solutions - IDS Pay™ for current account payments, IDS Collect™ for delinquent account collection and IDS Recover™ for post charge-off recovery. And, since our society is becoming more and more dependent on the mobile handset as a primary contact device, Apollo recently introduced IDS Mobile™ for mobile payments and collections interface.”

In related news, Apollo announced it has surpassed the transaction processing benchmark of \$2 million daily in online collections for its clients through the Apollo Intelligent Debt Solutions™ (IDS) system.
